Modular Approval Request Letter

Date: Jan. 9, 2006

Dear Sir,

There's an 11g mini-PCI Module that would like to have your authorization as a modular approval. The specific product as below, 11g mini-PCI Module, with its designed features and specified description, meets special requirements for full modular approval on FCC Public Notice DA 00-1407 by cross-reference list below.

Company	: Handlink Technologies Inc.	
Model Name	: 11g mini-PCI Module	
Model Number	: HL-11G	
FCC ID	: TWS-HL-11G	

1. The modular transmitter must have its own RF shielding. Please see external photo.pdf 2. The modular transmitter must have buffered modulation/data inputs. 3. The modular transmitter must have its own power supply regulation. 4. The modular transmitter must comply with the antenna requirements of Section 15.203 and 15.204(c). 5. The modular transmitter must be tested in a stand-alone configuration, i.e., the module must not be inside another device during testing. 6. The modular transmitter must be labeled with its own FCC ID number, and, if the FCC ID is not visible when the module is installed inside another device, then the offust of the device into which the module is installed must also display a label referring to the enclosed module. 7. The modular transmitter must comply with any specific transmitter and the manufacturer must provide adequate instructions along with the module to explain any such requirements. A copy of these instructions must be included in the application for equipment authorization. 8. The modular transmitter must comply with any specific requirements. A copy of these instructions must be included in the application for equipment authorization. 8. The modular transmitter must thave its own power applicable RF exposure requirements. For example, FCC Rules in Sections 2.1091, 2.1093 and specific Sections of		,
shielding. 2. The modular transmitter must have buffered modulation/data inputs. 3. The modular transmitter must have its own power supply regulation. 4. The modular transmitter must comply with the antenna requirements of Section 15.203 and 15.204(c). 5. The modular transmitter must be tested in a stand-alone configuration, i.e., the module must not be inside another device during testing. 6. The modular transmitter must be labeled with its own FCC ID number, and, if the FCC ID is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module. 7. The modular transmitter must comply with any specific rule or operating requirements applicable to the transmitter and the manufacturer must provide adequate instructions along with the module to explain any such requirements. A copy of these instructions must be included in the application for equipment authorization. 8. The modular transmitter must have its own power supply regulation. 9. The modular transmitter must device are regulated before energizing other circuits internal to the HL-11G meets the FCC antenna requirements. It has a unique connector. Please see external photo.pdf The HL-11G was tested in a stand-alone configuration via a PCMCIA extender. Please see conducted set-up photo.pdf The label position of HL-11G is clearly indicated. Please see the label.pdf The HL-11G is compliant with all applicable FCC rules. Detail instructions are given in the Users Manual. Please see Installation guide.pdf The HL-11G comply with applicable RF exposure requirements. Please see RF safety evaluation. pdf	Requirement of Public Notice DA00-1407	
2. The modular transmitter must have buffered modulation/data inputs. 3. The modular transmitter must have its own power supply regulation. 4. The modular transmitter must comply with the antenna requirements of Section 15.203 and 15.204(c). 5. The modular transmitter must be tested in a stand-alone configuration, i.e., the module must not be inside another device during testing. 6. The modular transmitter must be labeled with its own FCC ID number, and, if the FCC ID is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module. 7.
